

30. Morphological operations based on OpenCV using Dilation technique.

AIM:

Morphological operations based on OpenCV using Dilation technique.

PROGRAM:

```
import cv2
import numpy as np

img = cv2.imread(r"C:\Users\Susmitha\Downloads\ITA0510 Lab\exp1.png")

if img is None:
    print("Error: Image not found!") else:
    # Create a 5x5 kernel
    kernel = np.ones((5, 5), np.uint8)

    # Apply dilation
    dilation = cv2.dilate(img, kernel, iterations=1)

    # Save the output image
    cv2.imwrite(r"C:\Users\Susmitha\Downloads\ITA0510 Lab\Dilated_Image.jpg", dilation)

    # Display the images
    cv2.imshow("Original Image", img)
    cv2.imshow("Dilated Image", dilation)

    cv2.waitKey(0)
    cv2.destroyAllWindows()
```

INPUT:

OUTPUT:

RESULT:

Thus the program is executed successfully.
